

Clean Development Mechanism (CDM)

Oando Low Cost LPG Cook Stove Initiative Nigeria

Oando Marketing PLC cordially invites all stakeholders and the general public to a Stakeholder Consultation of our "Clean Development Mechanism (CDM) Programme of Activity Project (PoA)" named "Oando Low Cost LPG Cook Stove Initiative Nigeria."

The project activity aims to encourage low-income households in Nigeria to switch from the predominant fuel mix for cooking in Nigeria, i.e. kerosene, charcoal, and firewood from non-renewable sources, to Liquefied Petroleum Gas (LPG), a cleaner and more efficient fuel, compared to the pre-dominant fuels used for cooking amongst low income households in Nigeria. The project is expected to significantly reduce indoor pollution, deforestation and the emission of greenhouse gases in the atmosphere.

Through this meeting, Oando Marketing PLC wishes to solicit comments and contributions from relevant stakeholders and the general public on the proposed CDM PoA project. Your attendance and contribution to this stakeholder meeting is highly welcomed.

The Stakeholder Consultation meetings will take place at the following addresses:
